An h1 header

Paragraphs are separated by a blank line.

New line... Some changes... 😃

2nd paragraph. *Italic*, **bold**, and `monospace`. Itemized lists look like:

- this one
- that one
- the other one

Note that — not considering the asterisk — the actual text content starts at 4-colum

Convert arrows like `-->` or `==>` to → or ⇒

```
-->  →
<--  ←
<-->  ↔
==>  ⇒
<==  ⇐
<==>  ⇔
```

> Block quotes are written like so.
>
> They can span multiple paragraphs, if you like.

Use 3 dashes for an em-dash. Use 2 dashes for ranges (ex., "it's all in chapters 12–14" is supported. ☺

Write a todo list

- ☐ Step 1
- ☑ Step 1
- ☑ Step 1

An h2 header

Here's a numbered list:

1. first item
2. second item
3. third item

Here's a code sample:

```bash
#!/bin/bash

###### CONFIG
ACCEPTED_HOSTS="/root/.hag_accepted.conf"
BE_VERBOSE=false

if [ "$UID" -ne 0 ]
then
 echo "Superuser rights required"
 exit 2
fi

genApacheConf(){
 echo -e "# Host ${HOME_DIR}$1/$2 :"
}
```

(which makes copying & pasting easier). You can optionally mark the delimited block

```python
import time
# Quick, count to ten!
for i in range(10):
    # (but not *too* quick)
    time.sleep(0.5)
    print i
```

An h3 header

Now a nested list:

1. First, get these ingredients:

    *   carrots
    *   celery
    *   lentils

2. Boil some water.

3. Dump everything in the pot and follow this algorithm:

    ```
    find wooden spoon
    uncover pot
    stir
    cover pot
    balance wooden spoon precariously on pot handle
    wait 10 minutes
    goto first step (or shut off burner when done)
    ```

    Do not bump wooden spoon or it will fall.

Notice again how text always lines up on 4-space indents (including that last line whi

Here's a link to [a website](#).

Move the following to next page with `<div class="page-break"></div>`.

Some Headlines.

Headline 1

Headline 2

Headline 3

Headline 4

Headline 5

Headline 6

Tables can look like this:

Lorem ipsum
